

# OFFSET PRINTING

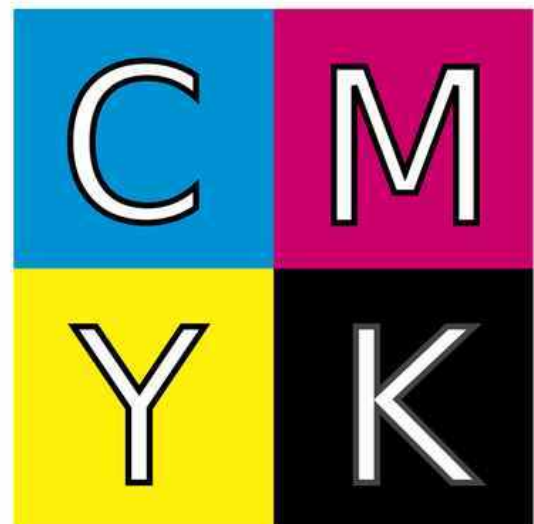

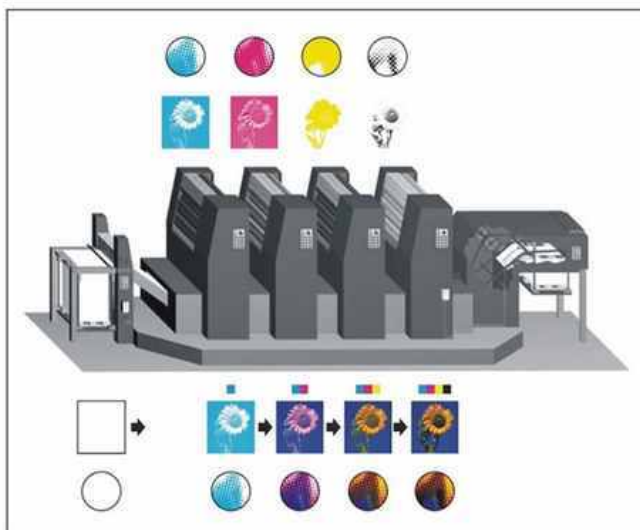

## OFFSET PRINTING MACHINE

Cutting-edge technologies like this offset-on-demand machine allows for quick print start-up and addresses the critical needs of short turnarounds, many different printed product types, short runs, and low cost.

This compact press can produce A1-size products and offers a 640 x 940 mm maximum sheet size. Capable of printing sheets up to 37 inches in width, this press has the power to address the full span of requirements in the publishing and commercial printing segments. Since color management can be implemented by including a CMS color bar on sheets with 8-up A4 or American letter size impositions, this machine is ideal for producing high page-count products with high print quality.

# LABEL PRINTING

## PERSONALISED LABELS

Flexographic printing is ideal for displaying your logo or company name on the packaging. You will receive your very own customised packaging in up to two colors.
